The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/597,855	Applicant(s) TOAL, TERENCE	
	Examiner JOSHUA I. RUDAWITZ	Art Unit 3652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 10-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Poten et al. (US5,249,907).

Poten et al. (Poten) discloses a carriage with rollers able to receive a defective wheel; a belt having a first end fixedly and permanently connected to a first end of the carriage and have a second end detachably connected to a second end of the carriage; a ramp having a first end detachably connected to the first end of the carriage and a second end remote from the carriage; the belt has a second securing position, where it secures the wheel by going from the first end to the second end; the second end of the belt is adapted to be hooked to the carriage; the belt has an adjustable length; the ramp and the carriage are separate parts; the ramp is adapted to be hooked to the carriage; the carriage has an axle and the ramp is hooked onto the axle; and the carriage has four rollers.

Poten fails to disclose the belts first position where the belt extends away from the first end of the carriage past the second end of the ramp, and the belt extends underneath or on top of the ramp; however, this would have been obvious to a person having ordinary skill in the art, at the time of invention, as it

Art Unit: 3652

has been held that rearranging parts of an invention involves only routine skill in the art, in this case the belt is just draped in the opposite direction as the second position.

Poten et al. discloses the bottom part is made of sheet metal, however fails to disclose the top part is made of plastic. It would have been obvious to a person having ordinary skill in the art, at the time of invention, to use plastic for the top part, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Response to Arguments

3. Applicant's arguments filed 10/28/2008 have been fully considered but they are not persuasive.

4. With regards to the applicant's argument that the belt of Poten is not fixedly attached to the carriage where the ramp is located, the examiner respectfully disagrees. The examiner notes that the belt is connected via intervening structure, and further, is fixedly attached otherwise the tension would not hold the wheel.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
